To

The Block Project Manager,
Block Project Management Unit
MegLIFE, MBDA

Sub: Final survey of 2023 plantation under MegLIFE.

Ref: No. MBDA/JICA/2023/72/1014 Dated: Shillong the 9th, May, 2023

BPMs,

The Plantation activity of 2023 under MegLIFE project is expected to be completed by the end of July 2023. Preliminary survey was conducted before the plantation activity and based on the preliminary survey, works such as advance action, staking-out and pitting and planting were executed. Now it is time for conducting 'Final Survey' in the 1st and 2nd week of August, 2023 of the 'planted-up areas' of the plots where plantation was done.

In this connection, the schedule is attached at Annexure 1 which indicates the allotment of VCFs for conducting final survey in the project villages. They are different from the VCFs who have conducted the Preliminary survey. All the designated VCFs are directed to conduct the final survey of the planted-up areas of the villages allotted to them and submit the final GPS survey reports by affixing their own signatures and submit through the respective BPMs. Concerned BPMs shall countersign and submit to SPMU through DPMUs. All financial adjustments (either shortfall of areas or excess areas) shall be made according to the final survey areas. Check survey in cases of further clarification could however be conducted by GIS wing.

2. Since advance action was completed within March, 2023 in most of the plots, heavy weed growth is expected due to heavy rains in Meghalaya. Therefore, you are directed to take up the 1st weeding works immediately wherever the plantation has already been completed and should complete within 2nd week of August, 2023 and submit compliance report. The sanctions for all plantation activities for the 1st year have already been issued to all respective DPMUs.

Enc: As above

(Shri Gunanka D B, IFS)
Additional Project Director
MegLIFE, MBDA
